

FourSide™ Jar

The original square jar

Dare to be square.

Aren't jars supposed to be round? Not if you want a great blend – which is why we invented the clear square jar back in 1991. The Blendtec FourSide Jar's square shape and patented single-prong wingtip blade create a better blending vortex. Rather than just chasing ingredients around in a circle, the FourSide jar forces the contents out against the wall and back into the blades. This creates the smooth consistency that Blendtec is known for.

The jar that changed an industry.

Ask any smoothie shop, coffee house or other eatery, and you'll find that the best performance comes with jars that are square. The FourSide™ design forces ingredients off the sides and back down to the blade. Translating into fast, consistent blends every time.

Standard Features

VORTEX

- Revolutionary 4-sided jar forces ingredients back into the blade

ERGONOMIC

- Lightweight material for easy lifting and pouring
- 3 corners for simple pouring at multiple angles
- Easy-to-read jar markings up to 32 ounces (2 quarts)

SAFE & STRONG

- Made from durable, long-lasting Eastman Tritan™ copolyester
- BPA-free
- Non-sharp blade makes cleaning safe and simple

CUSTOMIZE

- Custom jar graphics available

Every detail makes a difference.

FourSide Jars are stackable and feature easy-to-read markings. The ergonomic design allows for easy 3-way pouring. Plus, the FourSide™ Jar is shorter and is half the weight of other jars with comparable volume. And that means fewer accidents and sore arms at the end of the day.
